## CAREGRITS™

### Product Description

CareGrits™ is a line of stabilized whole grains and legumes which are steel-cut and calibrated to a precise size range of 1-4 mm. Caremoli's proprietary thermo-physical processing technology enables the production of fully or partially cooked products with unique properties:

#### Physical Properties

- Low total moisture content
- Reduced water activity
- Reduced plate count
- Inactivated enzymes
- Extended shelf life (up to 12 months)

#### Improved Sensory Properties

- Bright, stable color
- Appealing whole grain taste
- Crisp bite

#### Improved Nutritional Properties

- Improved digestibility
- Increased content of slowly digestible starch
- Decreased content of rapidly digestible starch
- Inactivated trypsin inhibitor in legume products

#### Food Applications

CareGrits™ products are used in a wide variety of finished goods across many categories:

- **Bread Products:** Bread, pizza crust, flatbread, bagel, crackers and tortilla inclusions and toppings
- **Meals, Soups and Side Dishes:** Quick-cook main meal solutions, soup inclusions and toppings, cooked cold-hold salads
- **Snacks:** Muesli-type bars, whole grain chips, extruded snacks
- **Cereal Products:** Hot and cold breakfast cereals and blends
- **Dairy/Frozen:** Yogurt and ice cream inclusions/toppings
- **Confectionery:** Chocolate bar inclusions

#### Benefits for Consumers

- All natural; no chemicals added
- All natural; no E-numbers
- Taste and appearance of whole grains and legumes
- Higher nutritional value compared to unstabilized whole grains and legumes
- Easy to eat grits format
